Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

The invention relates to a process for an ionic polymerization of lactams. The process comprises: dissolving a catalyst, a lactam and a regulator in molten lactam; introducing the molten mixture into a mixing device or mold and the heating the mixture to obtain bulk polymerization of lactam in no more than 15 minutes. The closest prior art of record is to Schmid et al, al., US 5,747,634. Schmid et al., teach a continuous process for the activated anionic lactam polymerization, wherein a liquid system is employed which simultaneously contains activator and anionic catalyst for the polymerization of lactam. Schmid et al failed to teach or suggest the addition of the catalyst and regulator into the molten lactam as described in this application. Therefore, claims 1-4 and 6-22 are allowable.
